PREFACE

The Twentieth Century and the *Twentieth Century Dictionary* began together, and they ran together through half the century's course. The work of the editor, Mr. Thomas Davidson, was continued by various members of the editorial staff until it was found that ordinary revision no longer sufficed. A thorough overhaul was therefore made. Every word already admitted, every definition and etymology, was subjected to scrutiny. New words and phrases—some never before given in a general dictionary, some not until now appearing in a dictionary at all—were collected from many sources. These were very numerous, owing to developments of science, social changes, new habits of life and recreation, and new habits of language resulting from these—notably furthered by the virtual drying up of the Atlantic as a speech barrier. A very few words have been discarded altogether. These belong chiefly to two classes—ghost words, which come by copying or reading amiss, and dictionary words that somebody with a Greek or Latin Dictionary has concocted but nobody so far as can be discovered has ever used.

As before, the aim has been to include all words in general use in literary and conversational English, and all words used in Shakespeare and the Authorised Version of the Bible, in the poems (and many of those in the prose writings) of Spenser and Milton, and in the novels of Walter Scott. It should be understood that to label a word *Milt.* does not mean that nobody but Milton has used it. This is not a dictionary of Scots, but many words of Burns, Ramsay, Fergusson, Galt, and Barrie will be found in it, with many that are still in familiar colloquial use in Scotland. These are marked *Scot.*, but in most cases they are current on both sides of the Border. Likewise we hope no Canadian will take it as a slight when he finds his words marked *U.S.* Indeed such has been the diffusion that many in Britain may object to such labelling; but let them take it as historically true. Dialect words that have made good their footing in literature have been included, with such slang words as seem likely to maintain themselves as well as some dead slang that may puzzle readers, say, of Dickens.

The original edition acknowledged special indebtedness to two American Dictionaries, the *Century* and the *Standard*. The revised *Webster* has further strengthened our American side. The *Oxford Dictionary*, which of course must be the foundation of all English

dictionaries, had been used as far as it went, as had Wright's *Dialect Dictionary*. The *Oxford* was completed in 1933, Wright in 1905. Two great Scottish dictionaries now in progress have been much used and would have been more used had their publication kept pace with the work—the *Dictionary of the Older Scottish Tongue* begun by Sir William Craigie and the *Scottish National Dictionary* of Mr. Grant and his successors. For Latin etymologies we have been guided chiefly by Ernout and Meillet's *Dictionnaire étymologique de la langue latine*, for Greek by Boisacq's *Dictionnaire étymologique de la langue grecque* and the new Liddell and Scott. For old French we have Godefroy's *Dictionnaire de l'ancienne langue française*. Some definitions have been adopted or adapted from our own *Technical Dictionary*.

A great part of the construction of this dictionary has been in the hands of Miss A. M. Macdonald. The whole owes much to the vigilance of Mr. J. Liddell Geddie who read a large part of the proofs, and several other members of the staff have made useful contributions. Dr. Angus Macdonald has helped with the etymologies. Finally, scores of users of the dictionary have sent in single words and lists of words. We have not accepted all their suggestions. One was disappointed not to find *myristicivorous*, feeding upon nutmegs, a word to which we grant this place on the doorstep but still deny admission to the dictionary. To these correspondents we owe much, and we tender our thanks, especially to those who first make sure that their words are not already in.

WILLIAM GEDDIE.

NOTE TO THE USER OF THE DICTIONARY

The Arrangement of Words.—Every word is given in its alphabetical order, except in cases where, to save space, derivatives are given under a head-word. The participles and past indicative of uncompounded verbs (and other parts where desirable), and the plural of nouns, are given under the head-word when any doubt is possible. When a derivative stands under a head-word with no meaning given, its meaning can at once be got by combining that of the head-word with that of the suffix. Thus the meanings of *darkness* are obtained by adding the meaning of *-ness* to those of *dark*. Where there has been a shift of meaning or a specialised meaning has developed, derivatives are defined in full.

Key to the Pronunciation.—The pronunciation is given immediately after each head-word by spelling the word anew. Below is a summary of the only points that require comment :—

- dh* is used for the initial sound of *then*
- zh* is used for the sound of *s* in *pleasure*
- gz* is used for the sound of *x* in *example*
- hw* is used for the sound of *wh* in *when*
(some will disagree, but they may interpret it in their own way)
- hh* is used for any open guttural (Scots or German) as in *loch*
- ngg* is used for the sound of *ng* in *linger*
- ngk* is used for the sound of *nk* in *monkey*

The key to the long vowels and diphthongs (appearing at every opening of the dictionary) is :—

fāte, fār, āsk; mē, hēr (her); mīne; mōte; mūte; mōōn

(*ā* means that the vowel may be pronounced either long or short)

Nasalised vowels are represented by a following *n^e*, as *ān^e-hōr* (encore). Neutral vowels in unaccented syllables are shown by means of a turned *e* or schwa—

el'ə-mənt, in'fənt, ran'dəm

Where the sound of a letter in a derivative differs from that in the head-word the pronunciation of at least part of the word has been added in parentheses. Sometimes several variations occur under one

head-word : in such cases the position of the stress accent will serve as guide to the particular model among the derivatives to be followed.

Spelling.—Letters in brackets may be inserted or omitted. The suffix *-ise* has been given in that form. There is much to be said for *-ize*, which seems to be gaining ground. It would have taken up too much space to give both (along with *-ization*, *-izer*, etc.). Let it be understood that in all cases choice is free. This of course does not apply to such words as *surprise*, *revise*, where *ise* is not a suffix.

The Meanings.—The meanings have been arranged on two different principles according to convenience or usefulness. Sometimes the current or most important is given first ; sometimes the original or at least an early meaning, with others branching out and diverging from it. In the latter case the reader should be warned not to be turned aside by the label *obs.* (obsolete) preceding the first meaning given : it refers to that meaning, not to the word as a whole.

The Etymology.—The etymology is given in square brackets at the end of each article. The sign — is to be read ' derived from '. Whatever follows after a semicolon is not the source of the word but a word from the same ultimate source. Thus, when a word is traced back to Old English, an Old Norse, say, or a Greek word from the same root may follow, but the Old English word is not in such a case derived from Old Norse or from Greek. Within an article the partial etymologies of derivatives are often inserted in round brackets. Each long vowel in Old English and Old Norse is marked with an acute accent, in Greek and Latin with a macron. Any vowel unmarked is to be taken as short. Because we are using no accents, we have had to give Greek words in uncontracted form. Greek words with a subscript iota are also given at full length, as in inscriptions.

DETAILED CHART OF PRONUNCIATION

Respelling is a rough method of showing pronunciation compared with the use of phonetic symbols, but the following table will be useful for reference in cases of doubt.
